CLOUD MAIL

SYNAQ CloudMail is an innovative messaging and collaboration platform that reduces Total Cost of Ownership (TCO), improves email reliability and ensures compliance. It features 2GB/50GB/100GB mailbox options, shared calendaring, shared contacts, global address lists, individual distribution lists, file storage, superior conversation views, native archiving, web document management and compatibility with all popular mail clients (including Outlook).

You can switch to SYNAQ's CloudMail with confidence and begin reaping the benefits immediately. It's coupled with SYNAQ's resilient cloud infrastructure hosted at Internet Solutions' world-class data centres and backed by an industry-leading Service Level Agreement (SLA).

END-USER BENEFITS

- **All-in-one.** This solution offers email, contacts, calendar, tasks, documents and archiving all on a single platform.

- **Supersized mailbox.** With a 2GB, 50GB or 100GB mailbox, managing mailbox quotas and deleting mails are no longer a daily worry for end users.

- **Optional Branding.** Centrally transforms every business email into a targeted marketing and communication engagement.

- **Secure Mail Experience.** Allows you to secure your business from email-borne threats with the dominant cloud email security platform for businesses. It now comes with added risk mitigation using advanced security features like DLP LinkShield and the Identity Threat Protection (ITP) toolset.

- **Simple and Efficient Mail Interface.** Modem user-friendly mail interface provides end users with functionality like tagging, drag-and-drop, conversation view and advanced search options to manage their mailboxes more efficiently.

ADMINISTRATOR BENEFITS

- **Increased Control.** Administrators have full control to manage user accounts, email aliases, calendar resources, archive and discovery access and distribution lists through a full-featured web-based administration interface.

- **Greater uptime.** Enjoy total peace of mind as your messaging infrastructure is monitored, maintained, supported and backed by a 99.9% uptime guarantee.

- **Total Integration.** Integrates with your on-premise Microsoft Active Directory and LDAP services for extended enterprise Single Sign-on.

- **Easy-to-use.** Eliminate the need for additional product training, third-party integrations and additional mail complexity.

- **Email archive.** With a tamper-proof, unlimited storage archive and discovery, Cloud Mail delivers compliance, simplicity and peace of mind all-in-one.

- **More secure.** Keep dangerous email-borne threats at bay with the inclusion of SYNAQ Securemail backed by 100% virus protection and the only 100% punitive phishing SLA offered in the market today.

- **Comprehensive Migration Process.** Data migration from existing mail servers is efficient and reliable with proven migration technologies and the support of SYNAQ's service team.

FINANCIAL BENEFITS

- **Reduced TCO.** Save as much as 80% of total costs compared with other collaboration and archiving solutions

- **Industry-Compliant.** Limit the risk of possible penalties for non-compliance with free, tamper-proof, unlimited storage email archiving and discovery.

- **No Set-Up Costs.** Simple setup within hours without incurring any unnecessary set-up costs.

- **Scaleable.** The solution supports your business needs as your company grows while you only pay for what you use.

Bolster your email security posture against brute force and password dictionary attacks without disrupting user access with seamless Zimbra integration for secure, reliable, and compliant email services.
