

# SECURE ARCHIVE

**With tamper-proof unlimited email storage, a highly available and robust cloud service that effortlessly integrates across all major email server platforms (including Exchange), and exceptionally fast search and retrieve functionality, SYNAQ Archive is the most comprehensive and hassle-free email archive and compliancy cloud solution on the market.**

Delivered as an integrated cloud service and supported 24x7 by local SYNAQ engineers, your business can start to benefit from the peace of mind of a tamper-proof and compliant email archive solution, today.

To become a SYNAQ client, contact us on:  
(011) 262 3632 or email [sales@synaq.com](mailto:sales@synaq.com)

**SYNAQ**  
BE EMPOWERED.

## END-USER BENEFITS

- **Advanced discovery** supports searches within multiple attachment types (e.g. Word, Powerpoint, RTF, PDF and ZIP).
- **Exceptionally fast** search and retrieve capability produces results in seconds.
- **Easy-to-use web interface** ensures quick and easy archive search functionality that allows emails to be viewed, printed or restored.

## ADMINISTRATOR BENEFITS

- Maximum control over inbound, outbound and internal communications for record retention, regulatory compliance, disaster recovery, litigation and discovery purposes.
- Painless data ingestion from existing email servers such as Exchange and desktop clients (including Outlook).
- **Multiple email system support** including Microsoft Exchange 2003/2007/2010/2013, Lotus notes, Zimbra, Postfix, Sendmail, Qmail, iMail, AXIGen, Commuigate Pro, Neon Insight and others
- Secure Email Functionality as archived emails are encrypted using triple DES encryption and stored in their own isolated application instance.
- Unlimited storage with a retention period ensures that all business-critical emails are securely archived.
- **Tamper-proof email archive** with an audit trail of all system activities.

## FINANCIAL BENEFITS

- **Scalable email solution** that grows with your business as your needs evolve, without the additional cost to you.
- **Pay-as-you-grow** and remove the expense of hardware or software licenses, while only paying for what you need.
- **Reduced storage needs** achieved by supporting Microsoft Exchange message stubbing to dramatically reduce your email storage needs.
