E-Merge Technologies

About E-Merge Technologies

As a SYNAQ partner in Nigeria, E-Merge's focus on open-source, enterprise-ready solutions has helped countless organisations succeed with Linux and SYNAQ implementations.

The Challenge

E-Merge's clients struggled with costly and complex email solutions. They needed a provider who understood the specific needs of growing businesses and could deliver solutions that fit within modest budgets.

The Solution

Since becoming a SYNAQ reseller, E-Merge Technologies has signed numerous clients onto the SYNAQ ecosystem. The biggest, a large boutique hotel, uses SYNAQ CloudMail and SecureMail with Branding. The hotel's IT manager says he is very impressed with the functionality of the DLP and ITP features of SecureMail, and the marketing department makes regular use of the branding tool.

The Outcome

Thanks to SYNAQ's intuitive reseller portal and tailored email solutions, E-Merge has minimized support calls and expects business growth of 163%. They're excited to continue this journey, knowing SYNAQ's support has paved the way.

SYNAQ
BE EMPOWERED.
